- 8K Ultra HD
- Filmmaker Mode

¹For non-native 8K content, utilizes AI-based formulas to upscale to 8K.

²QLED televisions can produce 100% Color Volume in the DCI-P3 color space, the format for most cinema screens and HDR movies for television.

³165Hz is limited to 4K resolution and requires compatible content connection from compatible PCs. Motion Xcelerator 165Hz is sometimes called Motion Xcelerator Turbo 8K+.

⁴Super Ultrawide GameView is supported for PC games only. Super Ultrawide GameView is only available for ultra wide supported games. Some game title may not support the function or be limited to use this feature. Screen resolution change from external device may be required.

⁵Samsung Account required for network-based smart services, including streaming apps and other smart features. Separate [connected] computer, mobile or other device may be necessary to create/log in to Samsung Account (free to download and create). Without Account log in, only external device connections (e.g., via HDMI) and terrestrial/over-the-air TV (only for TVs with tuners) available.

⁶Alexa is built-in.

⁷SmartThings compatible devices only. SmartThings app download may be required.

⁸Subscriptions may be required for some services. Smart Trainer support devices may vary by country.

⁹High speed internet connection, additional gaming service subscriptions and compatible controller required.

¹⁰HDMI-CEC (Consumer Electronics Control) facilitates convenient control functions with compatible devices.

¹¹Requires third-party control system installation. See www.samsung.com/us/business/custominstall.

¹²Q-Symphony requires compatible 2020-2024 Samsung TV and either a Q-series or S-series soundbar.

SEE BACK FOR DETAILS

QN800D Samsung Neo QLED 8K TV

KEY FEATURES (page 1 of 2)

Quantum Matrix Pro with Mini LEDs

Discover details you've been missing—even in dark and light scenes. It has 1.5x more lighting zones than normal Quantum Matrix technology for even greater detail.

Neo Quantum HDR 8K+

Take in a hyper-realistic 8K picture with color and contrast. See deep blacks, bright highlights and a wide spectrum of lifelike colors—all in stunning 8K resolution adding depth and brilliance to the image.

Real 8K Resolution With AI Upscaling¹

See a clear picture with 8K resolution. It instantly improves as you watch for 4x higher resolution than 4K— for everything from games to movies, all thanks to 512 AI neural networks that help update each scene.

AI Motion Enhancer

Eliminates motion stutter and sharpens small moving objects to provide the ultimate viewing experience. Never miss those hard-to-see details or blurred subtitles.

Dolby Atmos™ and Object Tracking Sound+

Put yourself in the middle of the action with built-in Dolby Atmos®. When cars are speeding across the screen, 3D sound moves right along with them thanks to Object Tracking Sound.

Real Depth Enhancer Pro

Experience depth and dimension on screen just like you do in real life. Real Depth Enhancer Pro finds the focal point in each frame and adjusts for a fully dimensional picture. It brings out the images in the foreground to better mirror real life.

NQ8 AI Gen2 Processor

See clear detail, stunning depth, shading and textures that results in a better-than-the-theater experience. Behind the scenes, the crazy-high-performance processor automatically transforms your content up to 8K, in addition to enhancing your audio and total TV performance. When every detail matters, it's worth seeing in 8K.

Motion Xcelerator 165Hz³

Stream your content with ultra-smooth motion and virtually no lag or blur. Faster response and rendering mean your button-mashing gets better results with visuals that stay crisp, no matter how much action is on-screen.²

Auto HDR Remastering²

Elevate your viewing experience with our best 4K color and contrast. AI-based algorithms help create brighter highlights and details.¹

Samsung Tizen OS⁴

Stream your favorite shows. Play games. Work out with a trainer. Do all you enjoy with Smart TV Powered by Tizen. Discover your must-have apps and streaming services all just a few clicks away.

¹ For non-native 8K content, utilizes AI-based formulas to upscale to 8K.
